

Jorge Flores-Urbe

Data Scientist & Analytics Engineer | ETL · ML Pipelines

Jalisco, Mexico | flurjor@gmail.com | linkedin.com/in/jorge-flores-uribe | floresjorge.github.io

5+ years building ETL pipelines, BI dashboards, and ML models across sales operations, government reporting, and commercial analytics. Currently pursuing an M.S. in Data Science at INFOTEC (exp. 2027). Proficient in Python, SQL, scikit-learn, Data Studio, and Grafana.

AREAS OF EXPERTISE

- ETL pipeline design and automation (Python, pandas, SQLAlchemy, SQL)
- Feature engineering, predictive modeling, and model evaluation (scikit-learn)
- Exploratory data analysis, customer segmentation, and cohort analysis
- BI dashboard development (Data Studio, Grafana, Tableau, matplotlib, seaborn)
- Data quality assurance, schema validation, and automated reporting
- CRM implementation, data migration, and quality assurance (Zoho, Escala)
- Low-code application development (AppSheet) and workflow automation (Google Apps Script)
- Geospatial analysis and GIS (QGIS, Folium)
- WhatsApp Business API automation and AI/LLM integrations

PROFESSIONAL EXPERIENCE

DOGDOG

Guadalajara, MX

Dec 2023 – Present

Data Analyst & Automation Specialist

- Consolidated 10+ disconnected data sources into a unified system (**3,000+ contacts, 10,600+ sales records**); designed extraction and transformation logic in Apps Script and Python for automated reporting and downstream ML.
- Built 5 automated dashboards and 20+ business reports in Looker Studio covering revenue, expenses, pricing impact, promotions, and marketing; used daily by four teams (purchasing, finance, management, leadership).
- Reduced financial reporting cycle from 2 weeks to 2 days by restructuring data pipelines and automating reporting workflows.
- Ran customer clustering on 800 georeferenced records using K-Means (selected after benchmarking multiple algorithms in scikit-learn) to map service coverage across Guadalajara's metro area; delivered interactive report to leadership.
- Connected Zoho, Escala CRM, Google Sheets, Meta Business, and WhatsApp API into automation workflows handling lead follow-up, campaign execution, and pipeline updates without manual intervention.
- Deployed an AI agent on WhatsApp for automated responses and dormant lead reactivation; achieved **8% reactivation rate** on cold leads and **10–12 purchases per campaign**.
- Designed a bronze/silver/gold data classification framework to standardize dashboard projections and keep reporting maintainable as it scales.

SISTEMA DIF GUADALAJARA

Guadalajara, MX

Feb 2023 – Dec 2023

Planning, Evaluation, and Monitoring Supervisor

- Produced audit-ready compliance reports using SQL and R covering **100% of agency services**; implemented systematic data quality checks ensuring government audit readiness.
- Designed and deployed a centralized service dashboard in Looker Studio and Grafana providing real-time visibility of all programs and users for the director's office.
- Integrated social program data with QGIS to perform geospatial analysis of vulnerable populations, optimizing resource allocation and supporting new program design.

INSTITUTO DE INFORMACIÓN ESTADÍSTICA Y GEOGRÁFICA DE JALISCO (IEGJ)

Guadalajara, MX

Oct 2022 – Jan 2023

Evaluator

- Conducted statistical analyses to identify patterns and trends in state-level violence prevention programs; crafted detailed analytical reports for policymakers.
- Assessed program outcomes against state-mandated standards, providing evidence-based evaluations of national violence prevention initiatives.

DOG DOG ENCAMINANDO A TU PERRO

Guadalajara, MX

Feb 2020 – Nov 2022

Operations Manager

- Monitored and managed KPIs across operations, finance, and customer service; produced audit reports and coordinated cross-functional training programs.
- Standardized customer service workflows and internal reporting, laying the operational foundation for subsequent data infrastructure buildout.

SELECTED PROJECTS

- **DogDog ETL & Churn Pipeline** — End-to-end Python pipeline (pandas, SQLAlchemy, scikit-learn) extracting AppSheet POS exports, engineering customer features, loading to SQLite, and generating churn predictions. github.com/floresjorge/dogdog-etl-pipeline
- **NivELE 2026 / IberLEF Shared Task** — CEFR-level classification of Spanish learner texts using an XLM-RoBERTa + LinearSVC ensemble. Finished 4th place (private leaderboard, Kaggle). Full system description paper produced.
- **Bi-objective TSP Optimization** — NSGA-II and GA implementations on the kroAB50 TSPLIB benchmark, with publication-quality Pareto frontier analysis.

EDUCATION

CENTRO DE INVESTIGACIÓN E INNOVACIÓN EN TIC (INFOTEC)

Present

Aug 2025 –

M.S. in Data Science and Information (in progress, exp. 2027) · Remote

Focus: Machine Learning, NLP, Statistical Modeling

ITESO | INSTITUTO TECNOLÓGICO Y DE ESTUDIOS SUPERIORES DE OCCIDENTE

B.A. in Philosophy and Social Sciences · Guadalajara, Mexico

Aug 2015 – May 2019

TECHNICAL SKILLS

Programming: Python (pandas, numpy, scikit-learn, SQLAlchemy, Folium), R, SQL, Google Apps Script

BI & Visualization: Looker Studio, Grafana, Tableau, matplotlib, seaborn, AppSheet

ML / Data Science: Classification, clustering (K-means, hierarchical), regression, NLP, feature engineering, churn modeling

Data Infrastructure: ETL pipeline design, SQLite, Google Sheets (advanced), schema validation, automated reporting

CRM & Automation: Zoho CRM, Escala CRM, WhatsApp Business API, Meta Business, AI/LLM APIs

Geospatial: QGIS, Folium

Languages: Spanish (native), English (advanced)

CERTIFICATIONS

- Databricks Lakehouse Fundamentals
- Google Data Analytics Certificate
- IBM Data Analysis with Python
